Field Service Mechanic/Technician – SE Sask. (Stoughton Area)

To support continued growth, we are looking for a Field Service Mechanic/Technician for SE Sask. Duties involve all-season, all-weather service, troubleshooting, repair and retrofits of small NG compressors in SE Sask., centered mainly within a 25km radius of Stoughton. Candidates must be willing to commute daily to our operations base in Stoughton.

Applicants will have an above average aptitude for diagnostics and repair of mechanical and electrical systems, familiarity with common computer applications including Outlook, Excel and Word, and possess a clean & valid Class 5 operator's license.

In return, we will supply the selected candidate with a fully equipped service truck, fuel card, tools, service repair parts, a cell and laptop. We offer a competitive compensation and health benefits package, flexible work schedule, and the opportunity to work in a dynamic and growing company.

To apply, send a resume in Word or PDF format to resumes@compactcompression.com
We thank you for your interest, however, only those candidates selected for an interview will be contacted.

Compact Compression Inc. is a privately owned Alberta based company engaged in the design, manufacture, and service of low horsepower, flexible, reliable, economical, portable and operator-friendly natural gas compression. We deliver technical and commercial advantages to our clients through the innovation and development of Natural Gas enhanced recovery equipment. Our team of dedicated engineers, technicians, and support staff are committed to providing No Hassle Compression[®] for our customers and resolving the challenges, they face today and tomorrow.
